3 1 FORMALISM IN GENERAL RELATIVITY
BASES OF NUMERICAL RELATIVITY
LECTURE NOTES IN PHYSICS VOL 846

PDF - Search results, Formalism is a school of thought in law and jurisprudence which assumes that the law is a system of rules that can determine the outcome of any case, without reference to external norms., In art history, formalism is the study of art by analyzing and comparing form and style. Its discussion also includes the way objects are made and their purely visual aspects., $\int \exp(-x^2) dx = \frac{\sqrt{\pi}}{2} \operatorname{erf}(x) + C$ (3) where erf is some positive integer.

All we have to do is take the differential $dI = da \cdot f(b)$ on both sides, getting $dI/da = \int_{-a}^a \exp(-x^2) dx = \sqrt{\pi} \operatorname{erf}(a)$ from which we easily find that $\frac{dI}{da} = \sqrt{\pi} \operatorname{erf}(a)$.
