(kit)., The RepRap project started in England

in 2005 as a University of Bath initiative to

develop a low-cost 3D printer that can print

most of its own components, but it is now

made up of hundreds of collaborators world

wide. RepRap is short for replicating rapid

prototyper.. As an open design, all of the

designs produced by the project are released

under a free software license, the GNU

General ..., The most obvious (at least to me)

method would be to 3D print the bolt blank

with the appropriate O.D. for the thread pitch

(look up in any machinist handbook) and

then simply run it through a die for the

desired threads.
