COMBINED AXIAL LOAD AND BENDING
C5.1 Combined Tensile Axial Load and
Bending C5.1.1 ASD Method The required
strengths T , M_x , and M_y shall satisfy the
following interaction equations: M_x by $t M T$
1.0 (6.4 a) $M_x T$ n_x n_y n and M_x by $t M T$
1.0 (6.4 b) $M_x T$ n_x n_y n where T required
tensile axial strength T_n nominal tensile
axial strength determined in accordance with
Sec., COMBINED LOADS Examples:
wide-flange beam supported by a cable
(combined bending and axial load),
cylindrical pressure vessel supported as a
beam, and shaft in combined torsion and
bending., Allowable combined axial & lateral
loads. Load-bearing walls must be capable of
handling vertical loads even when subjected
to lateral loads from wind or another force.,
