Bill Mah, Aaron Shufletoski Underhill Geomatics Ltd., Canada, Photogrammetry is the science of making measurements from photographs, especially for recovering the exact positions of surface points. Photogrammetry is as old as modern photography, dating to the mid-19th century and in the simplest example, the distance between two points that lie on a plane parallel to the photographic image plane, can be determined by measuring their distance on the image ..., Access Quick Stats (searchable database) The Quick Stats Database is the most comprehensive tool for accessing agricultural data published by NASS., This naturally sourced red pigment is formed when an extract from a commonly cultivated plant is mixed with a small amount
