method or mathematical process for problem

solving and engineering algorithms. The

design of algorithms is part of many solution

theories of operation research, such as

dynamic programming and

divide-and-conquer. Techniques for designing

and implementing algorithm designs are also

called algorithm design patterns, such as the

template method pattern and decorator ...,

line algorithm or plane sweep algorithm is an

algorithmic paradigm that uses a conceptual

sweep line or sweep surface to solve various

problems in Euclidean space. It is one of the

key techniques in computational geometry.

The idea behind algorithms of this type is to

imagine that a line (often a vertical line) is

swept or moved across the plane, stopping
