This book provides an overview of this specialized field and combines formulation, analytical, and regulatory aspects of low-dose development into a single reference book., so that it may become a tool for helping policy formulation and preparing its implementation. This paper will attempt to raise a series of questions in order to clarify the issues relating to NEC's activities regarding policy analysis, which is linked both to policy formulation and policy implementation, the two domains of NEC's responsibility» II., Strategy formulation requires a defined set of six steps for effective implementation. Those steps are: 1. define the organization, 2. define the

strategic mission, 3. define the strategic objectives, 4. define the competitive strategy, 5. implement strategies, and 6. evaluate progress., Before Starting an Analytical Plan Objectives and Endpoints: “ Estimation of parameters. “ Group comparisons. “ Associations of interest.
