SLIBFORYOU PDF - Search results, The

surface plasmon polariton (SPP) is an electromagnetic surface wave that travels along an interface between two media with different dielectric constants. It exists under the condition that the permittivity of one of the materials forming the interface is negative, while the other one is positive, as is the case for the interface between air and a lossy conducting medium below the plasma

..., Le phénomène le plus caractéristique des TIC est le brouillage des frontières entre télécommunications, informatique et audiovisuel/ multimédias.
