Elementary Linear Algebra solutions

specifically in linear algebra and functional  
analysis, the kernel (also known as null  
space or nullspace) of a linear map  $L : V \rightarrow W$   
between two vector spaces  $V$  and  $W$ , is  
the set of all elements  $v$  of  $V$  for which  $L(v) = 0$ ,  
where  $0$  denotes the zero vector in  $W$ ., In  
linear algebra, the column space (also called  
the range or image) of a matrix  $A$  is the span  
(set of all possible linear combinations) of its  
column vectors. The column space of a  
matrix is the image or range of the

corresponding matrix transformation.,
