Nachtsheim, Neter, and Li. ... Continuous random variables have a probability density

function (pdf) such that for $a < b$ $P(a \leq Y \leq b) = \int_a^b f(y)dy$ A model for a single

sample, 1.2 Simple linear regression model The simple linear regression function is

$Y_i = \beta_0 + \beta_1 X_i + \epsilon_i$ (1.1) In this model

β_0, β_1 , and ϵ_i are parameters and Y_i and

X_i are measured values. This is called a

"first order model" because it is linear in both

the parameters and the independent

variable., Applied Linear Regression Models
