electronics, a mixer, or frequency mixer, is a

nonlinear electrical circuit that creates new

frequencies from two signals applied to it. In

its most common application, two signals are

applied to a mixer, and it produces new

signals at the sum and difference of the original frequencies., Abstract. We present a satellite attitude control system design using low-cost hardware and software for a 1U CubeSat. The attitude control system architecture is a crucial subsystem for any satellite mission since precise pointing is often required to meet mission objectives.
