Our new functionality Track my article has
gone live on our Publishing Support site. This
is a new service for authors that allows them
to quickly and easily check the progress of
their submission in the overall publication
process., This comprehensive handbook
describes new experimental approaches for
the growing numbers of chemists, physicists,
and engineers working with atomic and
molecular beams., Molecular
nanotechnology (MNT) is a technology
based on the ability to build structures to
complex, atomic specifications by means of
mechanosynthesis. This is distinct from
nanoscale materials. Based on Richard
Feynman's vision of miniature factories using
nanomachines to build complex products
(including additional nanomachines), this
advanced form of nanotechnology (or
molecular ...), The JQC is a Joint Research
Centre, broadly dedicated to varied aspects

of quantum science and technology. The
JQC was founded in 2012, and is composed
of members from Durham departments of
Physics and Chemistry, and Newcastle
School of Mathematics, Statistics and
Physics., In chemistry and physics, atomic
theory is a scientific theory of the nature of
matter, which states that matter is composed
of discrete units called atoms. It began as a
philosophical concept in ancient Greece and
entered the scientific mainstream in the early
19th century when discoveries in the field of
chemistry showed that matter did indeed
behave as if it were made up of atoms.,
