triangulation is the process of determining

the location of a point by forming triangles to

it from known points.. Specifically in

surveying, triangulation per se involves only

angle measurements, rather than measuring

distances to the point directly as in

trilateration; the use of both angles and

distance measurements is referred to as

triangulation, 2 of 5| Page 15.

the boundaries of application can vary  
considerably according to context or  
conditions, instead of being fixed once and  
for all. This means the concept is vague in  
some way, lacking a fixed, precise meaning,  
without however being unclear or  
meaningless altogether. It has a definite  
meaning, which can be made more precise  
only through further elaboration ...,
