August 2012, the Sample Analysis at Mars
(SAM) instrument suite arrived on Mars
onboard the Curiosity rover. SAM's main aim
was to search for organic molecules on the
martian surface., Biology is the natural
science that studies life and living organisms,
including their physical structure, chemical
processes, molecular interactions,
physiological mechanisms, development and
evolution. Despite the complexity of the
science, there are certain unifying concepts
that consolidate it into a single, coherent
field. Biology recognizes the cell as the basic
unit of life, genes as ..., This bar-code

A macromolecule is a very large molecule,
such as protein, commonly created by the
polymerization of smaller subunits (). They

are typically composed of thousands of
atoms or more. The most common
macromolecules in biochemistry are
biopolymers (nucleic acids, proteins,
carbohydrates and lipids) and large
non-polymeric molecules (such as lipids and
macrocycles)., Department of Biological
Sciences Mission. As leaders in the
education of a highly trained and diverse
scientific workforce, our mission is to provide
a dynamic educational experience by
engaging students in hands-on,
inquiry-based learning activities at the bench
and in the field. Through these experiences
our students will gain a conceptual and
experiential understanding of the biological

visitors, We're asking for your help. For
over 20 years, the Learn.Genetics website

has provided engaging, multimedia educational materials at no cost.. Learn.Genetics is one of the most-used science websites., Organic matter preservation is central to understanding biological potential on Mars through time. Whether it holds a record of ancient life, is the food for extant life, or has existed in the absence of life, organic matter in martian materials holds chemical clues to planetary conditions and processes., To learn more about the standards and to view the NGSS Appendices, click here. Download a PDF of all standards grouped by Disciplinary Core Ideas (DCI) or click on a grade band below for individual DCI bundles of standards.DCIs are the fundamental ideas that are necessary for understanding a given science discipline., Luiz de Viveiros to Receive Department of Energy Early Career Research Program funding. Luiz de Viveiros, assistant professor of physics at Penn State University, has been selected by the U.S. Department of Energy's (DOE) Office of Science to receive funding for his research as part of the DOE's Early Career Research Program., Am.
