www.101science.com, Blood consists of cells

floating in plasma.. Most of the cells are red

blood cells.; A much smaller number are

white blood cells.; There are also fragments

formed from special cells in the bone

marrow, called platelets., Chapter 1

Introduction: Themes in the Study of Life 3

are ordered into In multicellular organisms

similar cells are organised into Large scale

communities classified by, 101 SCIENCE

(52) BIOLOGY SCIENCE Paper -3 Aims: 1.

To acquire the knowledge of the economic

importance of plants and animals. 2. To

develop an understanding of the inter-,

Taxonomy (from Ancient Greek ἰαξινομία, (),

meaning 'arrangement', and -ῆσις, (),

meaning 'method') is the science of defining

and naming groups of biological organisms

on the basis of shared characteristics.,

Recognising animal protection. This theme

examines recognition of animal sentience

and the importance of animal protection as a

societal value within the country, including

government support for the Universal

Declaration on Animal Welfare, prohibition of

cruelty and protection for different categories

of animals., Researchers report important

new insights into evolution following a study

of mitochondrial DNA from about 5 million

specimens covering about 100,000 animal

species., Form Three Biology Notes (ii) By

Kok Patrick 1997 6. Tooth decay and care of

teeth 7. Human Alimentary canal 8. Human

feeding process Activities, Habitat Animal

Printouts. The Earth has many different

environments, varying in temperature,

moisture, light, and many other factors. Each

of these habitats has distinct life forms living

in it, forming complex communities of

interdependent organisms.
