BIOMETRICS IN IDENTITY MANAGEMENT
CONCEPTS TO APPLICATIONS ARTECH
HOUSE INFORMATION SECURITY AND
PRIVACY PDF - Search results, Biometrics
is the technical term for body measurements
and calculations. It refers to metrics related
to human characteristics. Biometrics
authentication (or realistic authentication) is
used in computer science as a form of
identification and access control. It is also
used to identify individuals in groups that are
under surveillance.. Biometric identifiers are
the distinctive, measurable ..., UNHCR
Thailand/ Karenni A refugee provides his iris
scan and fingerprints as part of a verification
exercise jointly conducted by UNHCR and
the Royal Thai Government, Identity
management, also known as identity and
access management (IAM) is, in computer
security, the security and business discipline
that "enables the right individuals to access
the right resources at the right times and for
the right reasons". It addresses the need to
ensure appropriate access to resources
across increasingly heterogeneous

technology environments and to meet
increasingly ..., Biometrics allows a person to
be identified and authenticated based on a
set of recognizable and verifiable data, which
are unique and specific to them. Biometric
authentication is the process of comparing
data for the person's characteristics to that
person's biometric "template" in order to ...,
