The Department of Population and Quantitative Health Sciences (formerly the

Department of Epidemiology and Biostatistics) draws on the core disciplines of

Epidemiology, Biostatistics, and Public Health to help support students in developing

the knowledge, skills and competencies needed to assume positions of leadership

with the ultimate goal of advancing the public's health., The mean of a probability

distribution is the long-run arithmetic average value of a random variable having that

distribution. In this context, it is also known as the expected value.For a discrete

probability distribution, the mean is given by  $\hat{\mu}$  (), where the sum is taken over all

possible values of the random variable and () is the probability mass function., An

experiment is a procedure carried out to

support, refute, or validate a hypothesis.Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.,

Incidence refers to the occurrence of new cases of disease or injury in a population over a specified period of time. Although some epidemiologists use incidence to mean the number of new cases in a community, others use incidence to mean the number of new cases per unit of population., 10 / A
