index-of.es, $\text{pH} = \text{pK}_a + \log\left(\frac{[\text{conj base}]_0}{[\text{conj acid}]_0}\right)$

In this form, the equation may

be also used for buffer solutions containing a

weak base and its salt where the salt is the

acidic component., Bufferbloat is a cause of

high latency in packet-switched networks

caused by excess buffering of packets.

Bufferbloat can also cause packet delay

variation (also known as jitter), as well as

reduce the overall network throughput. When

a router or switch is configured to use

excessively large buffers, even very

high-speed networks can become practically

unusable for many interactive applications ...,

Overview. A buffering agent can be either a

weak acid or weak base. Buffering agents

are usually added to water to form a buffer

solution, which only slightly changes its pH in

response to other acids and bases being

combined with it, particularly a strong acid or

a strong base. Another example is buffered

aspirin which has a buffering agent, such as

MgO or CaCO₃, that will help maintain the

..., Industrial Uses of Enzymes Bioprocessing

is the use of biological materials (organisms,

cells, organelles, enzymes) to carry out

manufacturing or treatment procedures of

commercial or scientific interest., 2. Tissue

Preparation We routinely fix in 4%

paraformaldehyde and cryoprotect in 20%
