BUILDING WITH COB A STEP BY GUIDE

PDF - Search results, Cob, cobb or clom (in Wales) is a natural building material made from subsoil, water, fibrous organic material (typically straw), and sometimes lime. The contents of subsoil naturally vary, and if it does not contain the right mixture it can be modified with sand or clay. Cob is fireproof, resistant to seismic activity, and inexpensive. It can be used to create artistic, sculptural forms, and ..., The term cob is used to describe a monolithic building system based on a mixture of clay, sand, straw and earth. The construction uses no forms, bricks or wooden framework; it is built from the ground up. Various forms of "mud" building have been used in many parts of the world for centuries, under a variety of names, and date from at least 10,000 years ago., Eastern Michigan University's College of Business is an AACSB accredited business school and has been named an outstanding business school by The Princeton Review every year since 2005., By the end of 1998 New Zealand had a suite of three Earth

Building Standards.
