i-FRAME® ANSI Process Pump with  
i-ALERT® Patented Intelligent Monitoring,  
A steam injector is typically used to deliver  
cold water to a boiler against its own  
pressure using its own live or exhaust steam,

replacing any mechanical pump. This was the  
purpose for which it was originally invented in  
1858 by Henri Giffard. Its operation was from  
the start intriguing since it seemed  
paradoxical, almost like perpetual motion, but  
its operation was later explained using ...,
