Chemical Reactions (Chapter 11) By C B 6th  
period . 1) Combination Reactions It  
is also referred to as a synthesis reaction It  
is a chemical change in which two or more  
substances react to form a new singular  
substance The product is a compound in  
this form of reaction, Chapter 11. Chemical  
Equations 11.1. Chemical Equation Concepts  
Under the right circumstances substances  
change into new substances. Such changes  
are called chemical transformations, or reactions. The original  
substances are called reactants, the  
substances resulting from the change are  
called products. Chemical reactions reveal the  
basic properties of substances that form the  
heart of chemistry., Chapter 11 - Download

directly related to the  $E_a$  values because the  
rates of all chemical reactions are  
determined by their  $E_a$  values rather than  
their overall energy changes. there is an
