Human Genome Work, Chapter 14

Introduction Why are human conditions, such

as fatigue, complacency, and stress, so

important in aviation maintenance? These

conditions, along with many others, are

called human factors. Human factors directly

cause or contribute to many aviation

accidents. It is universally agreed that 80

percent of maintenance errors involve human

factors., To study human inheritance,

biologists use pedigree charts. A pedigree

chart shows relationships within a family. The

inheritance of a trait can be traced through

the family. From this, biologists may

determine the genotypes of family members.

It is difficult to link an observed human trait

with a specific gene., 14-1 Human Heredity

Human Chromosomes “ Pieces of DNA

that are found within the nucleus of a human

cell. Biologists take chromosomes in their

condensed form during mitosis, cut them out

and organize them in pairs. This produces a

product called a karyotype., Chapter
