In a conservation context, gap analysis is a
method to identify biodiversity (i.e., species,
ecosystems and ecological processes) not
adequately conserved within a protected

Mathematical analysis is the branch of
mathematics dealing with limits and related
theories, such as differentiation, integration,
measure, infinite series, and analytic
functions.. These theories are usually studied
in the context of real and complex numbers
and functions.Analysis evolved from
calculus, which involves the elementary
concepts and techniques of analysis.
