The term originates from *nĀivus*, which is Latin for "birthmark", however, a nevus can be either congenital (present at birth) or acquired., A mole is a massive structure, usually of stone, used as a pier, breakwater, or a causeway between places separated by water. The word comes from Middle French *mole*, ultimately from

Latin *mĀlĀs*, meaning a large mass, especially of rock; it has the same root as molecule and mole, the chemical unit of measurement., Notes on the Thermodynamics of Solids J.W.
