 5.2 Introduction 5.3 Effects of long-term loading
 5.3.1 Environmental effects, i The methodology for calculating the renewable share of total final energy consumption has been modified from earlier versions of the Renewables Global Status Report (GSR). Based on the previous methodology, the estimated share for 2015 is about 19.6%. For details, See endnote 12 for this chapter.
 ii, A turbine blade is the individual component which makes up the turbine section of a gas turbine or steam turbine. The blades are responsible for extracting energy from the high temperature, high pressure gas produced by the combustor. The turbine blades are often the limiting component of gas turbines. To survive in this difficult environment, turbine blades often use exotic materials like ... , 84
 This chapter discusses two major issues: (i) fuel cell theory and engineering, and (ii) providing fuel for the fuel cell. The first section thoroughly discusses the science behind fuel cells in general., POWER

Negi - GETCO, I pg.2 Permitting requirements of geothermal heat exchangers in NYC: - list of agencies involved - water tests required by regulatory agencies Heating and cooling loads, the effect of load dominance., Underfloor heating and cooling is a form of central heating and cooling which achieves indoor climate control for thermal comfort using conduction, radiation and convection. The terms radiant heating and radiant cooling are commonly used to describe this approach because radiation is responsible for a significant portion of the resulting thermal comfort but this usage is technically correct ... , Foreward to Board-Approved 2016-2017 Transmission Plan At the March 15, 2017 ISO Board of Governors meeting, the ISO Board of Governors approved, ABS Annual Meeting Summary ABS Annual Meeting 2016 was a great success!
