peer-reviewed scholarly literature, Green

chemistry, also called sustainable chemistry,

is an area of chemistry and chemical

engineering focused on the designing of

products and processes that minimize the

use and generation of hazardous

substances. Whereas environmental

chemistry focuses on the effects of polluting

chemicals on nature, green chemistry

focuses on the environmental impact of

chemistry, including technological ..., Learn

Packaging, Shipping and Testing Batteries,

Built to perform: A facile, one-step

hydrothermal method is used to synthesize a

3D, symmetric, flowerlike Sb_2S_3

nanostructure (see figure) for application as

a photoelectric material. The structure is

composed of numerous nanoneedles, which

provided a large void fraction and specific

surface area, and has better electrocatalytic

activity and charge-transfer ability than

that of platinum., The following outline is

provided as an overview of and topical guide

to chemistry: . Chemistry " science of

atomic matter (matter that is composed of

chemical elements), especially its chemical reactions, but also including its properties, structure, composition, behavior, and changes as they relate the chemical reactions. Chemistry is centrally concerned with atoms and their interactions ... , Get more information about 'Journal of Hazardous Materials' Journal.
