COMBINATORIAL OPTIMIZATION

ALGORITHMS AND COMPLEXITY DOVER

BOOKS ON COMPUTER SCIENCE PDF -

Search results, In applied mathematics and theoretical computer science, combinatorial optimization is a topic that consists of finding an optimal object from a finite set of objects.

In many such problems, exhaustive search is not feasible., In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.,
