COMMON CASTING DEFECTS DEFECT ANALYSIS AND SOLUTION PDF - Search results, A casting defect is an undesired irregularity in a metal casting process. Some defects can be tolerated while others can be repaired, otherwise they must be eliminated. They are broken down into five main categories: gas porosity, shrinkage defects, mold material defects, pouring metal defects, and metallurgical defects., Chapter 10 Pribulov, Alena, Barto, Marianna, Baricov, Dana QUALITY CONTROL IN FOUNDRY "ANALYSIS OF CASTING DEFECTS, What Causes Metal Casting Defects? Die casters know that it is not possible to produce without the use of die lubricants (release agents)., Die casting is a metal casting process that is characterized

by forcing molten metal under high pressure into a mold cavity. The mold cavity is created using two hardened tool steel dies which have been machined into shape and work similarly to an injection mold during the process., Guide to GMAW welding defects and suggested corrective actions.
