Practice Page Electric Current 1. Water

doesn't flow in the pipe when (a) both

ends are at the same level. Another way of

saying this is that water will not flow in the

pipe when both ends have the same

potential energy (PE). Similarly, charge will

not flow in a, The concept that additionally

depends on location in a gravitational field

is (mass) (weight). (Mass) (Weight) is a

measure of the amount of matter in an object

and only depends on the number and kind of

atoms that compose it., T T Toward center of

circle Yes Yes Yes f f Because centripetal

acceleration is not zero n n Yes Provides

centripetal force for circular motion

CONCEPTUAL PHYSICS, 4 Vertical motion

is affected only by gravity; horizontal motion

does not affect vertical motion.

Non-Accelerated Motion I. The sketch shows

a ball rolling at constant velocity along a level

floor. The ball rolls from the first position

shown to the second in 1 second. The two

positions are 1 meter apart. Sketch the ball at

successive 1-second intervals all the way to

the wall (neglect resistance). a.,

Concept-Development 6-5 Practice Page

Equilibrium on an Inclined Plane 1. The block

is at rest on a horizontal surface. The normal

support force  $n$  is equal and opposite to

weight  $W$ . a. There is (friction) (no friction)

because the block has no tendency to slide.

2. At rest on the incline, friction acts.,

Concept-Development 8-1 Practice Page

Momentum 1. A moving car has momentum.

If it moves twice as fast, its momentum is as

much. 2. Two cars, one twice as heavy as

the other, move down a hill at the same

speed. Compared to the lighter car, the

momentum of the heavier car is as much.,

Electric Current 1. Water doesn't flow in the pipe when (a) both ends are at the same level. Another way of saying this is that water will not flow in the pipe when both, Concept-Development 29-2 Practice Page Reï-, ection Abe and Bev both look in a plane mirror directly in front of Abe (left, top view). Abe can see himself while Bev cannot see herself"but can Abe see Bev, and can Bev see Abe? To i-• nd the answer we con-, Concept-Development Practice Page 34-1 1. Water doesn't flow in the pipe when (a) both ends are at the same level. Another way of saying this is that water will not flow in the pipe when both ends have the same potential energy (PE). Similarly, charge will not flow in a conductor if both ends of the conductor are at the same electric potential., The distance between the balls decreases. The wavelength decreases, just as the distance between the balls in Question 5 decreases. 30 m 30 cm 1 m/s, concept-development\_5-1\_force\_diagrams\_and\_free\_fall\_se.pdf: File Size: 109 kb: File Type: pdf, concept development practice page 4 2 inertia answers File type: PDF and i
