CONCEPTUAL AND PRELIMINARY DESIGN FOR A HALE UAV PROCESS TOOLS AND DESIGN METHODOLOGIES APPLIED TO HIGH ALTITUDE LONG ENDURANCE UNMANNED AERIAL VEHICLE PDF - Search results, The aircraft design process is the engineering design process by which aircraft are designed. These depend on many factors such as customer and manufacturer demand, safety protocols, physical and economic constraints etc. For some types of aircraft the design process is regulated by national airworthiness authorities., The engineering design process is a methodical series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary. ..., Part 2 : System Design & Development.
