Control theory in control systems engineering  
deals with the control of continuously  
operating dynamical systems in engineered  
processes and machines. The objective is to  
develop a control model for controlling such  
systems using a control action in an optimum  
manner without delay or overshoot and  
ensuring control stability.. To do this, a  
controller with the requisite corrective  
behaviour is ..., A hierarchical control system  
is a form of control system in which a set of  
devices and governing software is arranged  
in a hierarchical tree. When the links in the  
tree are implemented by a computer  
network, then that hierarchical control system  
is also a form of networked control system, 3
