CS224N NATURAL LANGUAGE

PROCESSING WITH DEEP LEARNING

PDF - Search results, Aloha, I'm the chief

scientist at Salesforce and an adjunct

professor at Stanford's computer science

department. Previously, I was the founder

and CEO/CTO of MetaMind which was

acquired by Salesforce in 2016. I enjoy

improving the state of the art in AI through

research (deep learning, natural language

processing and computer vision) and making

AI easily accessible to everyone., Hi Richard,

I see that you use MATLAB and Java. It is

better than use, for instance, Theano (That I

see you also use)? I'm ML scientist (NLP),

various on ML concepts are clear to me

(specially on regularized machines and MLP)

although there is a huge to learn., The next

key concept isâ€¦! The bias-variance tradeoff.

As you add variables, interactions, relax

linearity assumptions, add higher-order

terms, and generally make your model more

complex, your model should eventually fit the

in-sample data pretty well.,
