CURVILINEAR PERSPECTIVE FROM VISUAL SPACE TO THE CONSTRUCTED IMAGE PDF - Search results, Perspective (from Latin: perspicere "to see through") in the graphic arts is an approximate representation, generally on a flat surface (such as paper), of an image as it is seen by the eye. The two most characteristic features of perspective are that objects are smaller as their distance from the observer increases; and that they are subject to foreshortening, meaning that an object's ..., In photography and cinematography, perspective distortion is a warping or transformation of an object and its surrounding area that differs significantly from what the object would look like with a normal focal length, due to the relative scale of nearby and distant features. Perspective distortion is determined by the relative distances at which the image is captured and viewed, and is due to ..., If you've been to a large gig or a festival in recent years, you've no doubt had the pleasure of hearing line arrays of loudspeakers in action. But why are line arrays the current 'best practice' in

large-scale PA, how did they evolve, and will they ever filter down to more modest gig venues?, Oral 3D computer vision Elastic Fragments for Dense Scene Reconstruction (project, PDF)Qian-Yi Zhou* (Stanford University), Stephen Miller (Stanford University), Vladlen Koltun (Stanford University), Representations from Orthogonal or Multiple Views.
