this text in a 300-level Engineering Statistics  
and Modeling course. The authors obviously  
expect that students have a background in  
basic differential and integral calculus, as  
well as basic statistics, prior to beginning this  
text., In probability theory, a continuity

statistics, a null hypothesis is a statement  
that one seeks to nullify with evidence to the

contrary. Most commonly it is a statement  
that the phenomenon being studied produces  
no effect or makes no difference. An  
example of a null hypothesis is the statement

Em estatística, intervalo de confiança (IC) é um tipo de estimativa por intervalo de um parâmetro populacional desconhecido.

Introduzido na estatística por Jerzy Neyman em 1937, [1] é um intervalo observado (calculado a partir de observações) que pode variar de amostra para amostra e que com dada frequência (nível de confiança) inclui o parâmetro de interesse real não observável., Daniel
