Digital Image Processing [Gonzales, Woods],

Digital image processing is an area

characterized by the need for extensive

experimental work to establish the viability of

proposed solutions to a given problem., have

uses in numerous other branches of digital

image processing. 3.1 Background. As noted

image processing deals with manipulation of

digital images through a digital computer. It is

a subfield of signals and systems but focus

particularly on images. DIP focuses on

developing a computer system that is able to

perform processing on an image., Chapter 2

Digital Image Processing Lecture Notes:

Lectures consist of lecture slides in pdf

format and accompanying audio in realaudio

format. Each slide has a button to activate

the audio clip that presents that slide.
