A team of undergraduates designed a stackable, omni-wheeled robot, dubbed "THOR", that placed third out of 54 teams at the American Society of Mechanical Engineers design competition., Vibration is a mechanical phenomenon whereby oscillations occur about an equilibrium point. The word comes from Latin vibrationem ("shaking, brandishing"). The oscillations may be periodic, such as the motion of a pendulum or random, such as the movement of a tire on a gravel road.. Vibration can be desirable: for example, the motion of a tuning fork, the reed in a
