Study the following extract and answer the

questions that follow:, New nuclear power

plants typically have high capital costs for

building the first several plants, after which

costs tend to fall for each additional plant

built as the supply chains develop and the

regulatory processes improve., Box and Cox

(1964) developed the transformation.

Estimation of any Box-Cox parameters is by

maximum likelihood. Box and Cox (1964)

offered an example in which the data had the

form of survival times but the underlying

biological structure was of hazard rates, and

the transformation identified this., Online
