Differential Equations, Fourier Series, Partial
Differential Equations., Differentiation.
Differentiation is the action of computing a
derivative. The derivative of a function $y =$
 $f(x)$ of a variable x is a measure of the rate at
which the value y of the function changes
with respect to the change of the variable x .,
The differential is defined in modern
treatments of differential calculus as follows.
The differential of a function $f(x)$ of a single
real variable x is the function df of two

independent real variables x and $\hat{I}^n x$ given
by, Porous materials are a frequent subject
of investigation in many areas of applied
