For the design of plated steel structures, the rules for shear lag effects and plate buckling that have been specified in EN 1993-1-5 may look novel for many practitioners who so far have been, (1) EN 1993-1-5 gives design requirements of stiffened and unstiffened plates which are

subject to in- plane forces. (2) Effects due to shear lag, in-plane load introduction and plate buckling for I-section girders and box, In order to promote public education and public safety, equal justice for all, a better informed citizenry, the rule of law, world trade and world peace, this legal document is hereby made available on a noncommercial basis, as it is the right of all humans to know and speak the laws that govern them., EN 1993-1-1: 2005 (E) Foreword This European Standard EN 1993, Eurocode 3: Design of steel structures, has been prepared by Technical Committee CEN/TC250 «Structural Eurocodes», the Secretariat of which is held by BSI., SR EN 1993-1-5-2007.pdf - Free download as PDF File (.pdf) or read online for free., NOTE 1 The rules in this part complement the rules for class 1, 2, 3 and 4 sections, see EN 1993-1-1.
