(1964) developed the transformation.
Estimation of any Box-Cox parameters is by
maximum likelihood. Box and Cox (1964)
offered an example in which the data had the
form of survival times but the underlying
biological structure was of hazard rates, and
the transformation identified this., As
Australia's leading Engineering faculty,
we create bold solutions to global
challenges. We have the most diverse range
of postgraduate programs in the country.,
scheme and syllabi for third to eighth
semesters of bachelor of technology in
electronics and communication engineering
from 2009 admission onwards
