Journal of Neural Networks and Applications
(AJNNA) as a miscellany of relevant
scientific articles on the results of research
carried out in laboratories in different
countries, including the theory of neural
networks and the practical implementation of
drafts in different directions of science and
technology. The magazine serves the
purpose of bringing together researchers in
the ..., An artificial neural network is a
network of simple elements called artificial
neurons, which receive input, change their
internal state (activation) according to that
input, and produce output depending on the
input and activation. The network forms by
connecting the output of certain neurons to
the input of other neurons forming a directed,
weighted graph., Since the proposal of a fast

learning algorithm for deep belief networks in
2006, the deep learning techniques have
drawn ever-increasing research interests
because of their inherent capability of
overcoming the drawback of traditional
algorithms dependent on hand-designed
features., Modified chitosan hydrogels as

Excellence in Research and Innovation for
Humanity. Forget? My Account, The World
Wide Web has become a major delivery
platform for a variety of complex and
sophisticated enterprise applications in
several domains. In addition to their inherent
multifaceted functionality, these Web
applications exhibit complex behaviour and
place some unique demands on their
usability, performance, security, and ability to
grow and evolve., Neural Network Design
