Greek letters are used in mathematics,
science, engineering, and other areas where
mathematical notation is used as symbols for
constants, special functions, and also
conventionally for variables representing
certain quantities. In these contexts, the
capital letters and the small letters represent
distinct and unrelated entities. Those Greek

.., Electromagnetic or magnetic induction is the production of an electromotive force (i.e., voltage) across an electrical conductor in a changing magnetic field.. Michael Faraday is generally credited with the discovery of induction in 1831, and James Clerk Maxwell mathematically described it as Faraday's law of induction. Lenz's law describes the direction of the induced field., Mysterious and often inexplicable remnants of civilization's history fascinate scientists and archaeologists. People travel worldwide to visit such sites, yet some of the most enigmatic artifacts and structures have been found right here in North America.
