Goodrich, Timothy Johnson Download: PDF Abstract: Ply number is a recently developed graph drawing metric inspired by studying road networks. Informally, for each vertex v , which is associated with a point in the plane, a disk is drawn centered on v with a radius that is α times the length of the longest edge incident to v , for some constant α in $(0, 0.5]$. The cooperative pulling paradigm is an experimental design in which animals cooperate to pull food towards themselves. Researchers use these experiments to try to understand how cooperation works and how and when it may have evolved. Meredith Crawford ran the first such experiment in 1937, attaching two ropes to a rolling platform that was too heavy to be pulled by a single chimpanzee., Academia.edu is a platform for academics to share research papers.
