Notes1 Special attention must be paid to
warnings and notes highlighted from the rest
of the text, Plastic is material consisting of
any of a wide range of synthetic or
semi-synthetic organic compounds that are
malleable and so can be molded into solid
objects.. Plasticity is the general property of
all materials which can deform irreversibly
without breaking but, in the class of moldable
polymers, this occurs to such a degree that
their actual name derives from this specific
ability., Davey 4 Inch Submersible. Davey 4"
