RPI-MODB-16GB-NOOBS, 4) 40-pin

connector: The B+ features an extended

40-pin GPIO, meaning that more sensors,

connectors and expansion boards can be

added to the board (the Model B originally

featured a 26-pin GPIO). Usefully, the first 26

pins remain identical to the original Pi, so the

B+ is fully backwards compatible., The new

Raspberry Pi 3 Model B+ is the fastest

Raspberry Pi available, both in terms of raw

performance and Wi-Fi speeds. The new

board is a souped up version of the

Raspberry Pi 3 Model B, sharing many of the

same specs but overclocking the processor

to 1.4GHz -- a 16.7% increase., Introducing
