The New Potto Project NFP is Non Profit organization 501 (c)(3) created by Dr. Genick Bar-Meir and friends to build open content textbooks and open source software for college students. Potto Project's books are designed to be the best books., Mechanics (Greek  $\mu\epsilon\chi\alpha\iota\kappa\eta$ ) is that area of science concerned with the behaviour of physical bodies when subjected to forces or

displacements, and the subsequent effects of the bodies on their environment. The scientific discipline has its origins in Ancient Greece with the writings of Aristotle and Archimedes (see History of classical mechanics and Timeline of classical mechanics)., The specific weight (also known as the unit weight) is the weight per unit volume of a material. The symbol of specific weight is  $\gamma$  (the Greek letter Gamma).. A commonly used value is the specific weight of water on Earth at 4°C which is 9.807 kN/m<sup>3</sup> or 62.43 lbf/ft<sup>3</sup>.. The terms specific gravity, and less often specific weight, are also used for relative density, Fundamentals of Engineering Exam Page 2 Time for a Pop Quiz! Time for a Pop Quiz! Stress is a measure of the internal forces in a body

between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...
