An inertial frame of reference in classical

physics and special relativity is a frame of

reference in which a body with zero net force

acting upon it is not accelerating; that is,

such a body is at rest or it is moving at a

constant speed in a straight line. In analytical

terms, it is a frame of reference that

describes time and space homogeneously,

isotropically, and in a time-independent

manner., Physics (from the Ancient Greek

Physics (from the Greek *physis*, meaning "nature") is the fundamental branch of science. The primary objects of study are matter and energy. Physics is, in one sense, the oldest and most basic academic pursuit; its discoveries find applications throughout the natural sciences, since matter and energy are the basic constituents of the natural world.
