GIRAFFE BIOLOGY BEHAVIOUR AND
CONSERVATION PDF - Search results,

The giraffe (*Giraffa*) is a genus of African even-toed ungulate mammals, the tallest living terrestrial animals and the largest ruminants. The genus currently consists of one species, *Giraffa camelopardalis*, the type species. Because ethology is considered a topic of biology, ethologists have been concerned particularly with the evolution of behaviour and its understanding in terms of natural selection. Here is an evolutionist with experience in molecular biology, Francois Jacob. Francois Jacob won the Nobel Prize in Physiology or Medicine in 1965, along with two others, for discoveries concerning genetic control of enzyme and virus synthesis.
