without a clinical indication. All interventions, including medications, need to be monitored for efficacy, risks, benefits and harm.,
Introduction A pandemic is a global disease outbreak. An influenza pandemic occurs when a new influenza virus emerges for which there is little or no immunity in the human population, begins to cause serious illness and then spreads easily person-to-person worldwide., This document provides guidance to help decrease the spread of influenza (flu) among non-healthcare workers during the 2009-2010 flu season. It recommends actions that non-healthcare employers should take now to decrease the spread of seasonal flu and 2009 H1N1 flu in the workplace and to help ...
