En biologie, les bâtonnets (ou « cellule en bâtonnet ») sont des cellules réceptrices situées au fond de l'œil qui font partie, avec les cônes, des cellules photosensibles de la rétine. Ils permettent la vision scotopique, c'est-à-dire avec une luminosité faible. Grâce à un pigment nommé rhodopsine, ils transforment le flux électromagnétique de la lumière en signal bio ... Sweetness is a basic taste most commonly perceived when eating foods rich in sugars. Sweet tastes are regarded as a pleasurable experience, except perhaps in excess. [citation needed] In addition to sugars like sucrose, many other

chemical compounds are sweet, including aldehydes, ketones, and sugar alcohols. Some are sweet at very low concentrations, allowing their use as non-caloric sugar ... Taste, gustatory perception, or gustation is one of the five traditional senses that belongs to the gustatory system. Taste is the sensation produced when a substance in the mouth reacts chemically with taste receptor cells located on taste buds in the oral cavity, mostly on the tongue. Taste, along with smell and trigeminal nerve stimulation (registering texture, pain, and temperature ... This bar-code number lets you verify that you're getting exactly the right version or edition of a book. The 13-digit and 10-digit formats both work. Frank H. Netter was born in New York City in 1906. He studied art at the Art Students League and the National Academy of Design before entering medical school at New York University, where he received his Doctor of Medicine degree in 1931.
