of that time was a part of the evidence the  
theory aimed to explain. The financial  
instability hypothesis also draws upon the  
credit view of money and finance by Joseph,  
New institutional economics (NIE) is an  
economic perspective that attempts to  
extend economics by focusing on the social  
and legal norms and rules (which are  
institutions) that underlie economic activity  
and with analysis beyond earlier institutional  
economics and neoclassical economics. It  
can be seen as a broadening step to include

aspects excluded in neoclassical economics., where  $S$  represents years of completed education,  $X$  represents the number of years an individual has worked since completing schooling, and  $e$  is a statistical residual. In the absence of direct information on experience Mincer proposed the use of "potential experience": the number of years an individual of age  $A$  could have worked, assuming he started school at age 6, finished  $S$  years of ...
